## India

### Oilseeds and Products Update

**October 2010**

**Approved By:**

David Leishman

**Prepared By:**

Amit Aradhey

**Report Highlights:**

Total area planted to kharif oilseeds, which includes mostly peanuts, soybean and sunflower, was 14.5 million hectares. Good monsoon rains in 'kharif 2010' facilitated oilseed planting progress; with peanut crop accounting for most of the increase in acreage. The edible oil import forecast for MY 2010/11 is revised up marginally to 8.7 million tons. The import basket includes 6.8 million tons of palm oil, 1.4 million tons of soybean oil, and 500,000 tons of sunflower seed oil and 45,000 tons of other edible oils. Importer interest is expected to continue, especially in light of the zero import duty on crude edible oils. Oil meal export forecast for MY 2010/11 is revised up to 4.9 million tons.

#### **Author Defined:**

#### **PEANUT PLANTING UP 13 PERCENT OVER LAST YEAR**

According to the Agriculture Ministry's progressive planting report ([Planting Report](#)) for the week ending September 10, 2010, total area planted to kharif oilseeds, which includes mostly peanuts, soybean and sunflower, was 14.5 million hectares; marginally up over last year. Good monsoon rains in 'kharif 2010' facilitated oilseed planting progress; with peanut crop accounting for most of the increase in the acreage.

Area sown under **soybeans** is estimated at 9.3 million hectares, down 170,000 hectares over its previous estimate. The MY (marketing year) 2010/11 (October/September) soybean production forecast is revised up from Post's earlier estimate of 9.3 million tons to 9.6 million tons. Planted area declined mostly in Maharashtra and adjoining states as farmers shifted soybean acreage to pulses, cotton and other remunerative crops in anticipation of better returns. Revival of monsoon rains over central India since mid-June, 2010 facilitated planting progress. The overall good rainfall distribution during critical crop growth stages helped Madhya Pradesh plant a record 60 percent of the total soybean area in India. Soybean production estimate for 2009/10 has been revised up by 250,000 tons to 9 million tons to reflect improved soybean supply situation and revised soybean crush estimates.

**Peanut** planting in this kharif season is estimated at 4.9 million hectares and production is forecast at 4.1 million tons. Late monsoon rains over major production regions may temper the kharif peanut production. Assuming normal winter rains and rabi (winter) season peanut crop planting at 1.1 million hectares, MY 2010/11 total peanut acreage is estimated at 6.1 million hectares and production is forecast at 6 million tons (down 6 percent over its previous forecast).

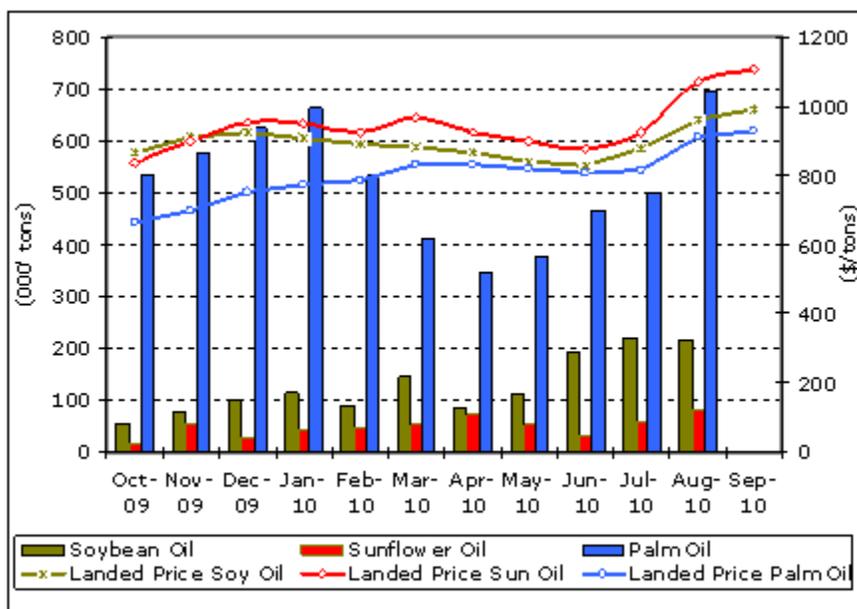

Area planted to kharif sunflower this year declined to 260,000 hectares from 542,000 hectares last year. Assuming normal winter planting, MY 2010/11 sunflower area is forecast at 1.1 million hectares and production at 700,000 tons. Based on current estimates, sunflower area and production for 2009/10 have been revised down to 1.4 million hectares and 807,000

tons respectively.

### EDIBLE OIL IMPORTS UP

The edible oil import forecast for MY 2010/11 is revised up marginally to 8.7 million tons. The import basket includes 6.8 million tons of palm oil, 1.4 million tons of soybean oil, and 500,000 tons of sunflower seed oil and 45,000 tons of other edible oils. Importer interest is expected to continue, especially in light of the zero import duty on crude edible oils. Taking advantage of the lower international prices of vegetable oils (See Chart 1) and the zero import duty, private traders have been buying large quantities of vegetable oils in recent months. Total edible oil imports during the October 2009 through August 2010 period were up by 3 percent, reaching 7.7 million tons (Table 1).

### Oilmeal Exports Down

The oil meal export forecast for MY 2010/11 is revised up from Post's earlier estimate of 3.4 million tons to 4.9 million tons due to increased domestic crushing of oilseeds and expected improvement in overseas demand. The export forecast includes 4 million tons of soymeal, 850,000 tons of rapeseed meal and 50,000 tons of other oilmeals. Total oil meal exports in MY 2009/10 (October, 2009 through September, 2010) were down 18 percent from the previous year, due to lower domestic crushing, reduction in demand for compound feed, fall in international prices (Chart 2) and subdued demand from Asian, Middle East and European countries (Table 2).
